

File Opening Instructions – Programming in Algorithmic Language MQL4

If you have trouble opening the document *Programming in Algorithmic Language MQL4*, follow these simple instructions:

- Open Windows Explorer
- Select the menu Tools → Folders Options
- Select the Tab “**File Type**”
- Select the extension “**CHM**” from the list
- Press the “**Change**” button and the “**Open with Dialog**” will appear
- Click “**Other**”
- Browse and select the program HH.exe
- Close the Folder Options Dialog
- On **Vista & XP** the end user need to unblock the file to be able to open it. (Right click on the file, and select “**Properties**” and Click on “**Unblock**” then Apply and the file will open correctly)
